

Dejan Token

White Paper

INTRODUCTION

Dejan Token is a decentralized finance token (DeFi) with the objective of generating self-liquidity for holders. In each transaction, the transaction is taxed at a rate of 10%.

You help ecology and ecology help are you , turn waste into ECO-SUSTAINABLE profits, and easier than you think, we are in the ECO-REVOLUTION, become part of it.

Our goal is to transform Dejan (Dejan Token) into a multinational company. Our purpose is to become an investment company that does recycling, collecting plastic waste and treating it in modern machinery until it becomes small granules. These granules are 100% sold to the plastic products industries in China.

Dejan Token (BEP20) is involved in the plastic waste recycling process and offers you the possibility to take part in it as recycling using a share in the earnings model. Our main objective is to intelligently merge Internet and business opportunities to help the recycling industry develop as efficiently as possible.

DEJAN TOKEN - REDISTRIBUTION

Dejan Token (BEP-20) is based on a dividend payout standard where holders will receive 10%.

Profit sharing from Recyclable Waste.

HOW DOES PASSIVE INCOME WORK FOR HOLDERS?

You buy the minimum amount of token needed to participate in passive income (30,000) and keep it in your wallet. You will receive 5% profit in our own currency (Dejan Token), which will become high sustainable, because each week, we will put on the market the profit that will come from recyclable waste.

The operation is very easy: you buy our currency and then put it on our staking site, earn weekly profits.

RATE : 10% Buy/Sell

5% - distributed to holders on each buy/sell transaction.

5% tokens burned.

OBJECTIVE PROJECT

Can you imagine GARBAGE turns into money?

That is our goal, Dejan Token is in the market to innovate this way and automate for the whole world, thus making it possible for everyone

How to earn with Dejan Token?

You invest in a minimum of (30,000 Dejan Token) and receive 5% in each transaction, an additional 5% is burned in each transaction, making the token more and more valuable, which makes it unique and its power sustainable. It will be high sustained with our recycling power, as we are going to transform the profit from the sale of waste into liquidity for the market, after the First complete recycling cycle that takes 1 week, it will receive weekly liquidity, thus making its value even greater.

When we talk about a cycle, we talk about tons of recycled waste, we throw that profit to our holders.

The number of complete recycling cycles is unlimited, garbage is disposed of every day, making this process unlimited, we recycle daily and extract profit weekly. Profit will be injected into liquidity to always keep the market moving.

You just have to keep it in your wallet and you will receive the profit all the time.
